EventPilot

One brief. A connected, sourced event plan.

Real specialist tools, transparent date decisions, protected budgets and draft-only outreach. A conditional plan, never a booking.

EVENT PACK

Event planning is a connected problem

One change. Many dependencies.

DATE + WEATHER

↓ Venue mode + safe logistics

↓ Budget + programme + people

↓ Sponsor request + promotion

Rain changes the venue, budget and outreach. Separate checklists lose these dependencies.

Validate together. Keep approvals explicit.

Actual tools, actual dependencies

Goal + sources → Date ‖ Budget ‖ Venue

↓ Five candidate-weather checks in parallel
↓ Risk threshold → genuine indoor re-plan

Talent ‖ Sponsors ‖ Programme ‖ Risks

↓ Outreach ‖ Promotion

Validation → bounded repair → Event Pack

From brief to editable assumptions

I want to organize a charity event at my university in March with a budget of RM2k.

EXPLICIT INPUT	DISCLOSED DEFAULTS
Charity event	Next March: 2027 at verification
March	100 attendees; Taylor's Lakeside
RM2,000 ceiling	Subang Jaya; RM1,400 organiser funds
	Beneficiary remains unconfirmed
